RENOLIT *PROFESSION* and REACH RENOLIT film qualities listed in Annex I

To whom it may concern,

an updated version of the official candidate list for Annex XIV of the REACH regulation (EC 1907/2006) has been published by the European Chemicals Agency (ECHA) on June 16, 2014. This list can be found on the ECHA-website (<http://echa.europa.eu>).

In accordance to article 33 of the REACH regulation, any supplier of an article containing a substance on the list in a concentration above 0,1 % (w/w) shall provide the recipient with sufficient information to allow safe use of the article including, as a minimum, the name of that substance.

RENOLIT *PROFESSION* informs that the articles mentioned in Annex I do not contain, in a concentration above 0,1 % (w/w), any substance included on the candidate list (status: June 16, 2014) set out according to article 59 (1,10) of the REACH regulation.

However it is not always possible to preclude low level raw material or film contamination of substances included on the candidate list and this might result in films containing such substances at trace level. Analysis of such substances does not necessarily form part of our quality control system.

Following our information, the packaging materials of our articles do not contain any substances included on the candidate list (status: June 16, 2014).

We provide this product information on the basis of our current knowledge and experience and can neither give any warranty nor assume any responsibility for factors outside our control or knowledge.
